Work is More Than a Job

Imagine the last social event you went to...

- When you met someone new, what did they ask you?
 - Did they ask your favorite book?
 - Did they ask what you do for a living?

Work is More Than a Job (cont'd)

The benefits of employment for people with mental illness are well documented:

- Increased financial stability
- Increased socialization
- Symptom management
- Development of new interests
- Reduced anxiety
- Increased self-esteem

For all of it's benefits, work can be stressful. But programs are available to help people living with mental illness find jobs that match their interests and provide follow along supports to work. Ticket to Work is a prefect example!

Work Can Be Therapeutic

“Work has been an important part of who I am, said an educator in our group. When you become useful to an organization and feel respected in that organization, there’s a certain value in belonging there.” The New York Times

Ellyn Saks - Associate Dean and Orrin B. Evans Professor of Law,
Psychology, and Psychiatry and the Behavioral Sciences at the University
of Southern California Gould Law School, an expert in mental health
law and a MacArthur Foundation Fellowship winner

Why Should You Choose Work?

Work can have many benefits, including:

- Money
- People who depend on you
- A routine
- Identity
- Increased sense of self-worth and hopefulness
- A place to meet friends
- Skills
- Independence
- Community
- Fulfillment

Four Dimensions of the Recovery Process

- 1. Home:** A stable and safe place to live
- 2. Purpose:** Meaningful daily activities, such as a job, school, volunteerism, family caretaking, or creative endeavors, and the independence, income and resources to participate in society

Four Dimensions of the Recovery Process (cont'd)

3. Community: Relationship and social networks that provide support, friendship, love and hope
4. Health: Overcoming or managing one's condition(s), as well as living in a physically and emotionally healthy way
